## INTRODUCTION

### REPORTING SCOPE AND BOUNDARIES (GRI 102-54, 102-12, 102-56)

This M1 sustainability report has been prepared in accordance with the Global Reporting Initiative's (GRI) Standards<sup>1</sup>: Core option, and is limited to operations under our direct control for the period 1 January to 31 December 2017. The GRI content index and the relevant references are provided on pages 109 to 112 of the report. To ensure comparability, we have used internationally-accepted measurement units and conversion factors for the reporting of performance data and indicators.

We regularly review our sustainability performance, monitoring and reporting processes, as well as new developments in sustainability reporting, to ensure ongoing improvement. This report has been updated to incorporate changes to Singapore Exchange's sustainability

reporting guidelines and the latest GRI Standards. We have sought assistance from a sustainability consultancy to ensure that alignment between the report content and the requirements of these two frameworks has been respected.

The content of this report has not been externally assured by any independent party.

### SUSTAINABILITY MANAGEMENT WITHIN M1 (GRI 102-18)

The evaluation of M1's economic, environmental and social performance is carried out at top management level by our Chief Operating Officer, supported by the heads of our key departments. Engagement approaches with our stakeholders, material topics and relevant mitigation measures are discussed and prioritised based on expectations and best practices within the current local and global sustainability contexts, but also on

the risks and opportunities relevant to M1's business operations. M1's management approaches and performance data are regularly re-assessed according to defined targets and adapted if necessary.

Key outcomes, performance updates and proposed changes in our sustainability framework are presented to the Board of Directors for their approval and input. The Board also has oversight of M1's sustainability reporting agenda.

### STAKEHOLDER ENGAGEMENT AND MATERIALITY (GRI 102-42)

We have identified eight stakeholder groups whose engagement with M1 is key to our sustainability efforts. We have strengthened existing engagement channels and created new ones to understand the expectations of each stakeholder group and identify the topics that are material to them.

<sup>1</sup> We have chosen GRI Standards (2016) as this is the latest version of the most widely used global and independent sustainability reporting framework.
